C program to implement string compare without Using built-in function.

## Algorithm:

Step 1: stort

Step 2: Input string, i=0

Step 3: while (strici]==stra[i] &&

Str[1]!=1/01/1+1

Step 4: if (Strici)>Stacij)

Steps: ("strista")

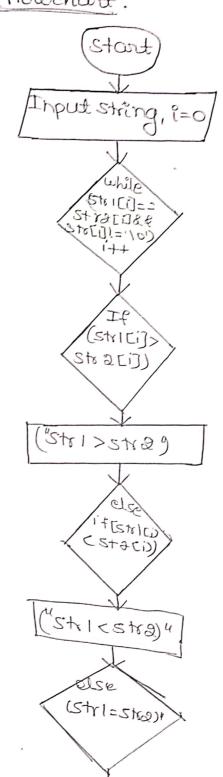

Steps: else if (Str [[] (Stracij)

Step7: ("Stil < Stra")

step8: else ("str=sta")

Step q: stop

Stop
